MENTAL HEALTH SCREENS

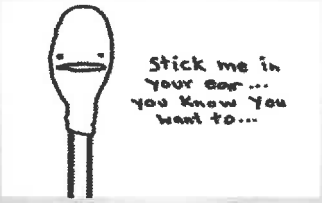
BQ( BEFORE QTIP)
No standardized screens.
Development and mental health questions incorporated in to the H&P
Positive and negatives were determined by provider subjectively

No MCHAT- few questions pertaining to autism in the H&P
No screens or questions for post partum depression

## STANDARDIZED SCREENS

- Time consuming
- Interferes with work flow
- Lack of resources for positive screens
- Provider does not believe in standard screens

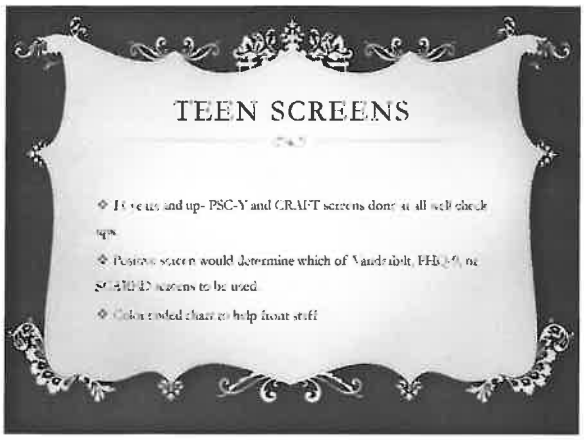
## SO WHAT HAPPENED ?



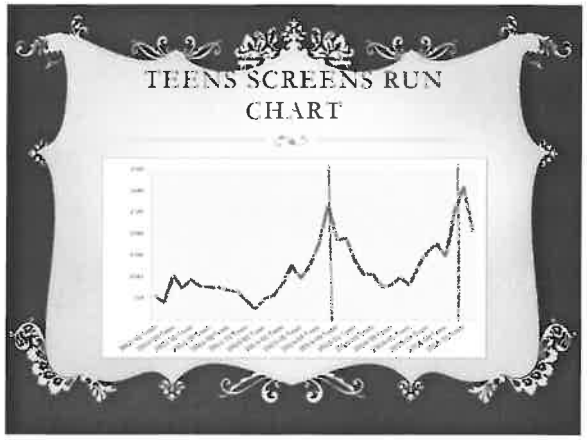
## AQ( AFTER QTIP)

- PEDS- standard screen administered at ages 9mo,18mo,24mo
- Unequivocal screens or positives to get Ages and stages
- Code 96110

PEDS SCREENS RUN CHART



TEEN SCREENS
❖ 15 years and up- PSC-Y and CRAFT screens done at all well check ups
❖ Positive screen would determine which of Vanderbilt, PHQ-9, or SCARED screens to be used
❖ Color coded chart to help front staff



TEENS SCREENS RUN CHART

## EDINBURG SCREENS
