3-6 Year Old Survey

(3rd birthday until 5 years and 364 days)

1. Did the patient have a well visit in the past 12 months?
   What counts:
   A well child visit in the previous year up to and including the visit in the last 10 kids seen between their 3rd and 6th birthday

2. Is the provider listed in the EMR the provider who saw the patient for the last well child visit?
   What counts:
   • If the doctor listed as primary in the medical record is the one who did the last well child visit, the answer is yes

3. Is there documentation that the patient is up to date on vaccines appropriate for the patient’s age?
   What counts:
   • Children before their 4 year well checkup or if no 4 year checkup less than 4 and a half years of age
   • Children after their 4 year well checkup or if no 4 year checkup greater than 4 and a half year of age

4. Is there documentation in the medical record indicating that a global developmental screening assessment (ASQ, PEDS, SWYC or similar) has been performed since 30 months of age? (MCHAT does not apply)
   What counts:
   • ASQ, PEDS, SWYC or similar count.
   • MCHAT does not as it screens only for autism

5. Is there documentation in the medical record that at least 3 of 5 age appropriate Bright Futures priorities were addressed at the most recent well visit?

   3 Year Visits
   • Social determinants of health
   • Playing with siblings and peers
   • Encouraging literacy activities
   • Promoting healthy nutrition and physical activity
   • Safety: car seats, chocking preventing, pedestrian safety, water safety, pets, firearm safety

   4 Year Visits
   • Social determinants of health
   • School readiness
   • Health nutrition and person habits
   • Media use
   • Safety: belt-positioning car booster seats, outdoor safety, water safety, sun protection, pets, firearm safety

   5 Year Visits
   • Social determinants of health
   • Development of mental health
   • School
   • Physical growth and development: oral health, nutrition, physical activity
   • Safety: car, outdoor, water, sun, harm from adults, home fire, firearm

QIDA 3 – 6 year

What counts:
  • Knowledge that patient got ROR book or other documentation of literacy efforts in the chart.

8. Is there documentation that a video screen exposure discussion took place as part of well child visits?
What counts:
  • In your audit of the last 10 charts of children between their 3rd and 6th birthday, did you find any mention of a discussion on television, video exposure or social media anywhere in the chart?
  • Should you score 100 percent on this measure? Maybe not, there might be higher priorities for your practice.

Promoting the Healthy and Safe Use of Social Media: Ages 1 through 4 years
  • Excessive social media interferes with focused adult-child interactions
  • Devices may interfere with sleep and should be turned off 1 hr prior to bedtime
  • Television should not be in child’s bedroom
  • TV should not be on during meal times
  • Parent’s use of interactive media has the potential to distract from parent-child interactions
  • AAP recommends media use plan www.healthychildren/MediaUsePlan

Promoting the Healthy and Safe Use of Social Media: Ages 5 through 10 years
Parents should:
  • Talk with their children about platforms and applications, and choose with them the ones best suited to their children’s ages
  • Help them understand how content can be misunderstood-and hurtful. (Address cyber-bullying)
  • Help them understand that nothing is truly private
  • Help them be safe (be careful about giving out personal information on line)

10. Is there documentation the medical record that the child was assessed for complex health care needs?
What counts:
  • Documentation of use of a list of diagnoses, query of patients, judgment from care giver or functional assessment of special health care requirements

11. Was the patient’s BMI over the 85th percentile?
What counts:
  • BMI recorded at last well child visit
  • Follow-up questions on whether elevated BMI was noted and acted upon.

12. Was the patient screened for tobacco exposure?
What counts:
  • Any evidence of smoking screening or discussion in the chart
13. Is there documentation in the medical record that the patient has a dental home?
   What Counts:
   • Any documentation that the patient has been to seen the dentist in the past year.

14. Is there documentation in the medical record that the patient received at least 1 fluoride varnish in the pediatric office in the past 12 months?
   What Counts:
   • Any record of fluoride varnish given to the patient in the past 12 months from the pediatric office.
