Aim Statement

- Timeframe
- Population
- Condition
- Measures

- 85% of asthma patients will have Asthma Action Plans by 12-1-15.

PDSA

- Plan
  - What you plan to do and the steps to execute
- Do
  - What did you observe
- Study
  - What did you learn? Did you meet your goal?
- Act
  - What did you conclude?

PDSA Cycle 1 Step 1

- Plan
  - Make a list of patients seen in last 4 years with diagnosis of asthma
- Do
  - Many of the patients were either not with practice or no longer had asthma
- Study
  - Ended up with a list of active patients with a diagnosis of asthma
- Act
  - Most patients needed to be seen for follow up. None had asthma action plans.

PDSA Cycle 1 Step 2

- Plan
  - Get patients in for follow ups to develop asthma action plans
- Do
  - Most parents comfortable caring for their children with asthma.
- Study
  - No, not all got asthma action plan
- Act
  - Start smaller
  - Space

PDSA Cycle 1 Step 3

- Plan
  - Change way recording data
- Do
  - Percentages increased
- Study
  - Yes, data was better able to guide changes
- Act
  - Will continue to use this way.
PDSA Cycle 1 Step 4

- Plan
  - See patients not seen yet - start flu vaccines
- Do
  - Most agreeable to flu vaccine
- Study
  - Not doing well on reviewing Asthma Action Plans
- Act
  - Need to upload Asthma Action Plans to Charts
  - Staff involvement
