QTIP UPDATE 2019

RAMKUMAR JAYAGOPALAN, M.D.
## 2019-What Did We Focus On?

### Breastfeeding Rates
- Initiation, 1mo, 4mo, 6mo rates
- Breastfeeding plan
- Lactation referral
- PostPartum depression screening
- Reach Out and Read
- Smoke exposure

### ADHD
- 30 day follow up after initiation
- Use of Standardised scales
- Identifying and addressing co-morbidities
Any Breast Feeding

WHAT DID THE QIDA SAY?

Any Breast Feeding

![Graph showing any breast feeding across cycles 1 to 11.](image-url)
Breast Milk at 6 months

ALL QTIP PRACTICES

Baseline  cycle 1  cycle 2  cycle 3  cycle 4  cycle 5
Life lesson

2+2=4 but 1+3=4

The lesson?

There's more than one way to do something.
HOW THEY DID IT

- LACTATION CENTERS- Referral and feedback loop established
- Using dedicated Lactation counsellors
- Using the Hospital’s Lactation consultant
- Using Lactation trained staff
- Breastfeeding plan
- Promoting Breastfeeding friendly Practice
- Coordinate with local WIC Lactation people
Breast Feeding Plan in Chart

All QTIP Practices

cycle 1  cycle 2  cycle 3  cycle 4  cycle 5  cycle 6  cycle 7  cycle 8  cycle 9  cycle 10  cycle 11
Social Determinants Screen
Reach Out and Read Book given
Family Screened for Tobacco Use

![Graph showing the percentage of family screened for tobacco use over cycles 1 to 11. The graph indicates an increasing trend with a peak at Cycle 7 and a slight decline thereafter. The line graph is labeled as "All QTIP Practices."
How did they do it?

- Making new patients appointment only after the Standardised screens are in
- Making the initial follow up appointment at the same time
- Giving 3 weeks worth Medication instead of 30 day supply
- Identifying and documenting co-morbidities a priority
- Creating ADHD folders
What Did the QIDA show?

Follow up in 30 Days

[Graph showing follow-up data over cycles 1 to 11]

All QTIP Practices
Co-morbidities Identified
